## PROFILE:

A positive and imaginative web developer, who has a penchant for solving problems. Wesley can be a strong force on any team, his ambition and energy help to really make a difference in making a project great. He works great under pressure, keeping a energetic outlook until the project is completed. He handles criticism well and uses it to better himself. Currently, he is seeking an entry level position in an awesome company that's looking to attract talented people.

## EXPERIENCE:

Back End Web Development Student, The IronYard, Nashville, TN Aug'16 - Nov'16

Attended an immersive boot camp style coding program with a concentration in Java. Built a variety of web apps, solo and in groups, from start to finish. My final collaborative project is a theme song generator, called Play Me In. Play Me In uses Java to randomly combine single voice music files into a single multi voice song in the genre of the users choosing.

Lead Line Cook, The Stone Fox, Nashville, TN Sept'12 - Jan'16

Worked in a fast paced, high volume environment, where attention to detail was tantamount to the success of the operation. On a daily basis, I managed inventory, on-boarded and trained new hires, while delegating responsibilities to team members based on their individual strengths.

## EDUCATION:

Nashville State Comm. College, Nashville, TN –  
AS Audio Recording, 2004
